

*Working, The Musical* – slide show photo ideas and cues

This is a photo list with general ideas of photo subjects tied to cues in the script. It is set up as three columns as if you are looking at the stage (stage right is on audience left, stage left is on audience right). The third column is the page number or song that corresponds to the image. We will have two laptops for control of the projectors – one for each side. That means two separate slide shows, one for each computer corresponding to each side. The preference is for original photos whenever possible, but in some cases stock shots will have to do. I will get you a script!
